Mg-based amorphous alloys. A. Inoue and T. Masumoto (Sendai, Japan)	1
Global simulation of heat transport, including melt convection in a Czochralski crystal growth process—combined finite element/finite volume approach. J. Baumgartl, A. Bune, K. Koai, G. Müller and A. Seidl (Erlangen, Germany)	9
Modellization and numerical simulation for bulk crystal growth processes T. Duffar, C. Barat and J.-Ph. Nabot (Grenoble, France)	15
Czochralski growth of oxide single crystals under conditions of forced convection in the melt. A. Majchrowski and J. Żmija (Warsaw, Poland)	19
The growth of single crystals of lead molybdate by the Czochralski technique. S. Brown (Cambridge, UK), A. Marshall and P. Hirst (Birmingham, UK)	23
Surface instabilities and dislocation formation during crystal growth N. Junqua and J. Grilhé (Poitiers, France)	29
Growth conditions for improving the quality of semiconductor single crystal material. H. Weishart and E. Bauser (Stuttgart, Germany)	33
Heterogeneous nucleation of solidification of Si in Al-Si C. R. Ho and B. Cantor (Oxford, UK)	37
Approximate analytical solution of nucleation problems P. Demo and Z. Kožíšek (Prague, Czech Republic)	41
Numerical modelling of transient binary nucleation Z. Kožíšek and P. Demo (Prague, Czech Republic)	45
Inhomogeneities in single-crystal components. U. Paul, P. R. Sahm (Aachen, Germany) and D. Goldschmidt (München, Germany)	49
Development of a new crystal growth process using a semiconductor powder and reducing the thermal stresses S. Sof, Y. Kolic, R. Gauthier, S. Etienne and P. Pinard (Villeurbanne, France)	55
Thermal analysis on zone-melting recrystallization of silicon-on-insulator films using a finite difference method H. H. Richter, B. Tillack (Frankfurt, Germany), H. Andrä (Karlsruhe, Germany) and W. Weinelt (Chemnitz, Germany)	59
Grain structure of silicon solidified from an inductive cold crucible S. Servant (Bourgoin, France), B. Pillin (St Martin d'Hères, France), D. Sarti (Bourgoin, France) and F. Durand (St Martin d'Hères, France)	63
Model-based directional solidification of semiconductor materials by the VGF-technique using multi-zone cold wall furnace technology D. Hofmann, T. Jung, N. Schäfer, D. Zemke and G. Müller (Erlangen, Germany)	67
Systematic study and periodic dependence of equilibrium distribution coefficients of admixtures on the atomic number of admixtures and their importance for crystallization J. Drápala, J. Luňáček, L. Kuchař and L. Kuchař Jr. (Ostrava, Czech Republic)	73
Numerical modelling of cellular and dendritic array growth: spacing and structure predictions J. D. Hunt and S. Z. Lu (Oxford, UK)	79

CONTENTS (continued)

Comparison of different analysis techniques to determine the cellular and dendritic spacing	85
A. Schievenbusch, G. Zimmermann and M. Mathes (Aachen, Germany)	
Monte Carlo simulation studies of dendritic instabilities with faceted tips	89
L. Jörgenson and R. Harris (Montreal, Que., Canada)	
Thermoelectric magnetohydrodynamic effects on solidification of metallic alloys in the dendritic regime	93
R. Moreau, O. Laskar, M. Tanaka (St Martin d'Hères, France) and D. Camel (Grenoble, France)	
Determination of dendritic coherency in solidifying melts by rheological measurements	101
L. Arnberg (Trondheim, Norway), G. Chai (Stockholm, Sweden) and L. Backerud (Auburn Hills, MI, USA)	
Semi-analytical calculation of equiaxed grain-size in recalcification conditions	105
B. Garda, F. Hodaj and F. Durand (Saint Martin d'Heres, France)	
Morphologies of primary Al ₃ Fe in Bridgman solidification and TIG weld traversing of hypereutectic Al-Fe alloys	109
D. Liang and H. Jones (Sheffield, UK)	
Microstructure vs. casting processes in the Fe-Si-Ca-Al system	115
F. Margarido (Lisbon, Portugal), J. P. Martins (Porto, Portugal), A. Gonçalves (Sacavém, Portugal) and M. O. Figueiredo (Lisbon, Portugal)	
Experimental investigation of the development of microsegregation during solidification of an Al-Cu-Mg-Si aluminium alloy	119
J. Lacaze and G. R. J. Lesoult (Nancy, France)	
Macrostructural development in aluminium alloys solidified vertically downwards	123
W. D. Griffiths and D. G. McCartney (Nottingham, UK)	
Irregular eutectic solidification	129
J. Liu and R. Elliott (Manchester, UK)	
Investigation of the Marangoni-motion on ternary Al-Si-Bi-alloys under microgravity conditions	133
H. Ahlborn (Hamburg, Germany), S. Diefenbach (Cologne, Germany), H. Neumann (Hamburg, Germany), B. Prinz (Frankfurt, Germany), L. Ratke (Cologne, Germany) and A. Romero (Frankfurt, Germany)	
Melt motions during unidirectional solidification of Al-Al ₃ Ni eutectics	137
P. Bárczy, V. Mertinger, Z. Gácsi, N. Babcsán (Miskolc, Hungary) and M. Meier (Bremen, Germany)	
Three-dimensional probabilistic modelling of equiaxed eutectic solidification in the presence of convection	143
Ch. Charbon, A. Jacot and M. Rappaz (Lausanne, Switzerland)	
Cooling schedule effects on the microsegregation in Al-Mg-Si alloys	149
T. Kraft and H. E. Exner (Darmstadt, Germany)	
Modelling of microporosity formation in aluminium alloys castings	155
H. Combeau, D. Carpentier, J. Lacaze and G. Lesoult (Nancy, France)	
The gas velocity profile of a free fall atomizer and its relation to solidification microstructure of collected spray droplets of 2014 aluminium alloy	161
S. A. Moir and H. Jones (Sheffield, UK)	
Microstructure development and ultramicrohardness of AlFeCe solidified under free fall conditions	165
J. Laakmann (Aachen, Germany)	
Effects of electromagnetic vibrations on the microstructure of continuously cast aluminium alloys	169
Ch. Vivès (Avignon, France)	
Crystallization kinetics of binary mixtures of isotactic polypropylene and poly(iso-propylene-stat-1-hexene)	173
G. Wiberg, P.-E. Werner and U. W. Gedde (Stockholm, Sweden)	
Optical monitoring of the solidification process of polyester and vinyl resins	181
D. Horvat and J. Možina (Ljubljana, Slovenia)	
Metastable solidification process of Ln ₃ Al ₅ O ₁₂ (Ln ≡ Dy, Y, Lu) garnets	185
S. Le Floch, J. C. Rifflet, J. Coutures, M. Gervais and J. P. Coutures (Orléans, France)	
Vibrational crystallization of optoelectronic materials	189
J. J. Venkrbec, J. Štětina, J. Kousal, L. Kaláb, Z. Čecíl, L. Prandžev, V. Rosická and J. Kohout (Prague, Czech Republic)	
Kinetics of oxide crystal growth in the transition regime between Cabrera-Mott and Wagner thickness regions	193
D. A. Jelski (Fredonia, NY, USA), L. Nánai, R. Vajtai, I. Hevesi (Szeged, Hungary) and T. F. George (Pullman, WA, USA)	

CONTENTS (*continued*)

Crystallization of "tunable" substrate optoelectronic materials	197
J. J. Venkrbec, J. Kousal, L. Kalab, V. Rosická, J. Kohout, Z. Čecil, J. Sedlacek, Z. Kodejs and M. Skokanek (Prague, Czech Republic)	
Microstructure of laser floating zone (LFZ) textured (Bi,Pb)-Sr-Ca-Cu-O superconductor composites	201
G. F. de la Fuente, M. T. Ruiz, A. Sotelo, A. Larrea and R. Navarro (Zaragoza, Spain)	
Steady state solidification of reinforced binary alloys	205
A. Mortensen (Cambridge, MA, USA)	
Settling of SiC particles in an AlSi7Mg melt	213
A. Kolsgaard (Trondheim, Norway) and S. Brusethaug (Sunndalsora, Norway)	
Particle pushing: the distribution of particles in liquid near a solid surface	221
Q. Han and J. D. Hunt (Oxford, UK)	
Effects of squeeze casting on the wide freezing range binary alloys	227
M. A. Savaş and S. Altintaş (Gebze, Turkey)	
Effect of ceramic particle size, melt superheat, impurities and alloy conditions on threshold pressure for infiltration of SiC powder compacts by aluminium-based melts	233
S. Y. Chong, H. V. Atkinson and H. Jones (Sheffield, UK)	
Fabrication of metal matrix composites using a helical induction stirrer	239
Ch. Vivès, J. Bas, G. Beltran and G. Fontaine (Avignon, France)	
Solidification microstructures of aluminium AlSi7Mg-SiC particulate composite	243
A. Kolsgaard, L. Arnberg (Trondheim, Norway) and S. Brusethaug (Sunndalsora, Norway)	
Microstructural defects in high productivity twin-roll casting of aluminium	251
D. J. Monaghan, M. B. Henderson, J. D. Hunt and D. V. Edmonds (Oxford, UK)	
Low pressure permanent mould process simulation of a thin wall aluminium casting	255
G. Kréziak, C. Rigaut and M. Santarini (Voreppe, France)	
Statistical distributions of fracture strengths of cast Al-7Si-Mg alloy	261
N. R. Green and J. Campbell (Birmingham, UK)	
Strain induced macrosegregation in squeeze cast Al-Ag and Al-Si alloys	267
T. Rølland, R. Flatval and L. Arnberg (Trondheim, Norway)	
Heat transfer during filling in die casting processes	271
P. Schmidt (Stockholm, Sweden)	
Continuous casting of steel: a close connection between solidification studies and industrial process development	275
M. Bobadilla, J. M. Jolivet, J. Y. Lamant and M. Larrecq (Maizieres-les-Metz, France)	
Model optimization of continuous casting steel secondary cooling	287
G. Alvarez de Toledo, J. Lainez and J. C. Ciri6n (Basauri, Spain)	
Control of molten steel flow in continuous casting mold by two static magnetic fields imposed on whole width	293
A. Idogawa, M. Sugizawa, S. Takeuchi, K. Sorimachi and T. Fujii (Chiba, Japan)	
Thermal soft reduction in continuously cast slabs	299
P. Siveson, C.-M. Raihle (Sweden, Germany) and J. Konttinen (Raahe, Finland)	
Theoretical analysis on the suppression of solidification shrinkage flow in continuously cast steel blooms	305
S. Sugimaru, J. Nakashima, K. Miyazawa and S. Ogibayashi (Chiba, Japan)	
Precipitation during the solidification and cooling of microalloyed iron	309
J. Kunze, B. Beyer, M. Leonhardt and C. Mickel (Dresden, Germany)	
Analysis of segregations in as-cast X40CrMoV51 steel	313
M. Torkar, F. Vodopivec (Ljubljana) and S. Petovar (Ravne na Koroškem, Slovenia)	
Numerical model for prediction of the final segregation pattern of bearing steel ingots	317
I. Vannier, H. Combeau and G. Lesoult (Nancy, France)	
Solidification modelling of microstructures in near-net-shape casting of steels	323
W. Löser (Dresden, Germany), S. Thiem (Duisburg, Germany) and M. Jurisch (Dresden, Germany)	
Continuous casting of thin wires and fibres by in-rotating-liquid spinning	327
G. Frommeyer (Düsseldorf, Germany) and B. Heyder (Ludwigshafen, Germany)	
Laser rapid solidification of Al-Cu alloys: banded and plane front growth	335
S. C. Gill and W. Kurz (Lausanne, Switzerland)	

CONTENTS (continued)

High speed laser cladding: solidification conditions and microstructure of a cobalt-based alloy	339
A. Frenk and W. Kurz (Lausanne, Switzerland)	
Fast-crystallizing Sb-based thin films under pico- and nanosecond laser pulses	343
C. N. Afonso, M. C. Morilla, J. Solis, N. H. Rizvi, M. A. Ollacarizqueta and F. Catalina (Madrid, Spain)	
Dynamics of the solidification of laser-annealed Si thin films	347
J. Boneberg, J. Nedelcu, H. Bender and P. Leiderer (Konstanz, Germany)	
Solidification of Al-6Zn-2Mg alloy after laser remelting	351
A. Roósz, I. Teleszky, F. Boros (Miskolc, Hungary) and G. Buza (Budapest, Hungary)	
Rapid solidification of undercooled eutectic and monotectic alloys	357
B. Wei, D. M. Herlach (Köln, Germany), F. Sommer (Stuttgart, Germany) and W. Kurz (Lausanne, Switzerland)	
Initial stage of rapid solidification of 18-8 stainless steel.	363
H. Mizukami, T. Suzuki, T. Umeda (Tokyo, Japan) and W. Kurz (Lausanne, Switzerland)	
Analysis of heat transfer in the process of ribbon casting by rapid solidification	367
L. Kubičár, S. Adamišová, P. Duhaj and D. Janičkovič (Bratislava, Slovak Republic)	
Factors controlling raft formation in electron beam buttons	371
P. N. Quested, D. M. Hayes and K. C. Mills (Middlesex, UK)	
Crystallization of amorphous thin LPCVD Si films: "in situ" TEM measurement of nucleation and grain growth rates	379
J. P. Guillemet, B. de Mauduit, B. Pieraggi, D. Bielle-Daspét and E. Scheid (Toulouse, France)	
Preparation and crystallization of Ti ₅₀ Mn ₅₀ amorphous alloy	383
C.-C. Chen, Z.-H. Chin and T.-P. Perng (Hsinchu, Taiwan)	
Thermal and electrical properties of metastable alloy 72%Ti-28%Co	387
B. B. Radojević (Belgrade, Serbia)	
High drop tube undercooling experiments on Ta-Zr alloys	391
E. Cini, S. Tournier and B. Vinet (Grenoble, France)	
Numerical simulation of cluster growth during the transient nucleation period in melt-spinning.	397
Z. Rivlin and J. Baram (Beer-Sheva, Israel)	
Rapidly solidified ribbons of Fe-2C-13Cr-1Si-Mo alloys by the planar flow melt spinning process	403
M. Haddad-Sabzevar and H. Fredriksson (Stockholm, Sweden)	
High speed transmission electron microscopy laser quenching	409
O. Bostanjoglo and D. Otte (Berlin, Germany)	
Casting of rapidly solidified AlPb-coatings	415
Th. Berrenberg (Aachen, Germany) and R. Mergen (Wiesbaden, Germany)	
AUTHOR INDEX	421
SUBJECT INDEX	423
